

Rotary Placers (Placer/Denester Systems)

Overview

Designed to be highly versatile with impressive accuracy and high speed for literature or shallow-tray feeding, multi-task assembly and denesting applications. Ideal in situations where you must not mar the product. Features innovative design and heavy-duty construction. Easily integrates with customers' existing equipment.

Pull and place products including literature, clamshells, CDs/DVDs, die cut cards, embossed items, irregular shaped items, pouches, stickers, pizza rounds, and much more. High speed placements at over 400 pieces per minute.

Standard Features

- Simple to operate
- Rotary gear design
- Positive vacuum pick-up mechanism using a mechanical valve
- High speed placements
- Heavy-duty construction
- Safety guard with interlock switch
