

V-2000IJ (Inkjet Series)

Overview

The most reliable and safest continuous IJ feeder in the market today! Capable of feeding flat and multi-thickness products into mail production streams including; inkjet and tabber systems, consistently at high speeds with exceptional alignment qualities.

The importance of straight feeding and minimizing skewing can help improve USPS® MERLIN™ verification results, leading to significant savings for you.

Feed a wide variety of flat and multi-thickness products including; manuals, cards, envelopes, flat cartons, perfect bound magazines, saddle-stitched magazines, sheet paper, and much more.

Standard Features

- Repositionable feed belts • Patented side guide hopper adjust
- Extended guides for product squaring • Two moveable separators
- Long lasting natural gum rubber feed belts • Variable speed control (local and remote) • Run enable interface • Heavy-duty construction
- Powder-coated steel frame • Adjustable product support rods
